1 Setting up Shexie with HealthLink

Please note: You will need to have the latest version of HealthLink SIX messaging installed. The HLINK directory will need to be shared and users will need to have read/write permissions to it.

If you are unsure about whether you have the latest HealthLink SIX software, or whether you have HealthLink at all then please contact the HealthLink helpdesk on 1800 125 036

1.1 Shexie set up to receive Pathology & Radiology Lab results

Shexie is hard coded to receive the pathology and radiology results to the \pathology\ directory on the Shexie server

[\\servername\pathology](#)

This is usually mapped to the F: drive as

F:\pathology

1.2 Shexie set up to receive Letters & Discharge summaries

Not yet possible in Shexie

2 Shexie set up to send acknowledgements

Shexie does not yet import HL7, so this section is not required

You will only need to setup the incoming path once.

Please note: The system paths mentioned above correspond to network locations. The network locations will vary from site to site. It is best practice to use full network paths to browse to the HLINK folder location. The HLINK directory will need to be shared and users will need to have read/write permissions to it.

If you are unsure about the paths mentioned above or have any other queries, please call the HealthLink helpdesk on 1800 125 036.

3 Importing Messages

When Shexie detect PIT results waiting in the \pathology\ directory an Icon will flash in the Shexie application (bottom right)

To import the results click on this flashing Icon
